

Architectural Standard for Storm Doors

The following storm doors are pre-approved for single doors. It is not necessary to submit a *Request for Architectural Approval* to install a pre-approved storm door. If you have a different type of door or you want to use a storm door other than one of the pre-approved storm doors, you need to submit a *Request for Architectural Approval* for individual consideration.

Storm Door Standard for All Single Doors

The following storm doors are pre-approved for installation on all single doors.

Anderson HD 3000 Fullview Door
Pella Select
Larsen Ultimate Signature Series

The storm door must conform to these specifications:

- It must be “full view”, with a narrow frame on all four sides of the glass as shown.
- It must not have mullions, cross bars or other framing in the glass area.
- The glass must not have a bevel or other decoration.
- The glass must be clear, not tinted. UV protection is permitted as long as it does not tint the glass.
- The storm door must be, as close as possible, either the same color as the existing door or as the existing door frame. For example, if the existing door is black in a white frame, the storm door can be either black or white.
- The storm door hardware must match in color, as close as possible, the hardware on the existing door. Brass with brass, white metal with white metal.

Full View Storm Door

It may be necessary to select another brand if one brand does not have the right frame and hardware colors.

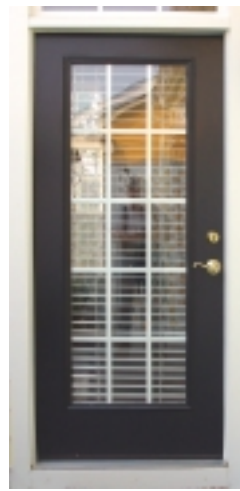

Storm Door Standard for Single French Doors

The storm doors listed for all doors are also pre-approved for single French doors as shown. In addition, the following storm doors are also pre-approved for installation with single French doors.

Anderson HD 2000/2500 Triple-Track Door (*)
Larsen Tradewinds Fullview (*)
Pella One-Touch Fullview
Pella Rolscreen Fullview (*)

These doors have sliding glass for ventilation. Models followed by an asterisk (*) also have built in screens.

The storm door must conform to the same standard as for all doors as above except the storm door for a single French door may have a single horizontal cross bar where the glass is divided.
